Comment: Special Eurobarometer 2005: Radioactive Waste; fieldwork in February – March 2005. Pluralities opposed.

Data: The SOM Institute, University of Gothenburg; Annual nationwide surveys in Sweden; Sample size 3 000 persons 15–85 years old; Mail questionnaires with an average response rate of 65 percent. *Question:* What is your view on the long term use of nuclear power as an energy source in Sweden? Five response alternatives: "abolish nuclear power by 2010 at the latest; abolish nuclear power, but not until our present reactors have done their job; use nuclear power and renew the reactors when they are worn out; use nuclear power and build additional reactors in the future; no definite opinion." In 1986, the "Don't know" response was left out; therefore the results for this year have been adjusted. The actual results were 84 percent "abolish", 13 percent "use" and 3 percent no answer.

Swedish Trust in Information about Energy and Nuclear Power from the Nuclear Power Industry

Percent

Data: The SOM Institute, University of Gothenburg; Annual nationwide surveys in Sweden.

Question: "To what extent do you trust information about energy and nuclear power provided by the following groups?" Four response alternatives: "very much; fairly much; fairly little; very little". The results show percent people answering very or fairly much when asked about the Nuclear Power Industry. The percentage base is defined as persons who answered the question.
